LeanDNA

Lean Project Management
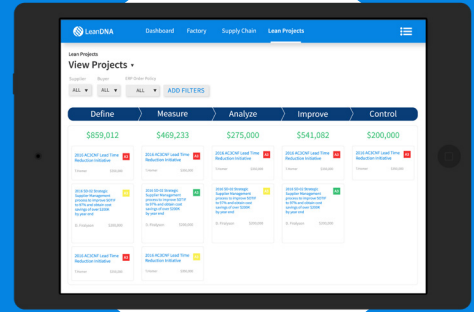

Technology to drive continuous improvement

Designed by lean practitioners and SaaS software experts, our Lean Projects module aligns with the traditional hoshin goal deployment process. It provides a standardized framework for driving lean improvement initiatives, communicating key project information, tracking actions, and reporting performance results. We provide visibility into lean initiative status and its impact on key performance indicators. Our lean project tracking system generates web-based reports that are updated in real-time based on project progress. These reports are used in weekly and monthly initiative reviews, along with automated email alerts to drive actions.

What LeanDNA Does:

- Aligns KPIs and targets with strategic initiatives to drive cost reductions throughout the organization
- Automates reporting across an integrated web platform
- Drives operational excellence throughout the business by translating goals into initiatives, and providing a best-practices structure for collaborative management and web-based reporting
- Tracks performance metrics against business targets across business units and value streams
- Triggers automated alerts for task status and assignments
- Incorporates best practice DMAIC lean improvement methodology

PLATFORM TO DRIVE OPERATIONAL EXCELLENCE AND ACHIEVE RESULTS

- Define and create improvement projects
- Link individual projects with Key Performance Indicators and strategic goals for your site
- Provide flexible, automated web reporting tools to drive daily and weekly accountability throughout the organization

Built for Lean

Built by domain experts, it increases your project delivery success through the implementation of lean practices.

Drives Results

Shift your focus from measuring and reporting to improving performance. Reduce non-value added efforts needed to manually generate reports.

Easy to Use

LeanDNA is a 100% cloud solution designed for business users to immidiately improve performance.

Keeps Execution on Track

No more isolated spreadsheets and/or other Office apps – all your data is in one place, in real time.

A3 Form Standardizes the Definition of Lean Initiatives

LeanDNA provides an out of the box A3 report to standardize the definition of lean initiatives. The A3 readily provides information used in weekly and monthly review cycles and goal planning.

## Control Tower to View Performance Metrics Cross-Site

LeanDNA Control Tower has three essential capabilities for managing complex supply chain perfor-mance end-to-end:

- **Visibility**: Real-time access to performance metrics across the entire business
- **Analysis**: Powerful analytics tools to understand performance metrics trends
- **Execution**: Streamlined processes—for performance metrics that cover processes such as planning, materials management, manufacturing, quality management, and distribution

Simple, Integrated Results

LeanDNA enables you to manage all your lean projects in one solution, an alternative to complex spreadsheets across multiple systems. This single data source driving execution, alerting, and reporting delivers confidence in the accuracy of information used to propel improvement initiatives throughout your organization.

With goals, initiatives and related KPIs in one solution, everyone involved in the strategy deployment process is aligned and focused on goal achievement.

Streamlines Your Operational Reviews

Automated scorecards linked to improvement actions make it easy to run regular operational reviews focused on continuous improvement of operational processes.

Free Up Leaders and Managers to Focus On Improvement and Execution

LeanDNA will remove the effort required to manage and update manual spreadsheets, PowerPoints, and other information sources. Leaders and managers can now focus on driving improvements.

Easy View of All Initiatives

Your team obtains one version of the truth – empowering your managers to make fast, effective decisions.

Designed to Improve Performance

We don t just measure performance; we drive actions to improve results.
